USE DIMENSIONS / VECTOR FILE

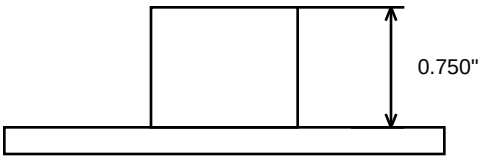

FRONT ELEVATION

FABRICATION DIMENSIONS

Overall panel	18 × 24 in
Overall metric	457.2 × 609.6 mm
Member width	0.750 in / 19.05 mm
Proposed relief	0.750 in / 19.05 mm
Stem C/L spacing	2.500 in / 63.50 mm
Branch angle	32°
Split position	Centered vertically

RELIEF PROFILE

Panel/substrate construction:
fabricator recommendation requested

FINISH / FABRICATION INTENT

- Field: deep dark green, smooth matte sprayed finish.
- Architecture: warm/off-white, smooth matte sprayed finish.
- Green field finish continues around visible exterior sides.
- No exposed raw substrate on visible surfaces.
- No visible fasteners or adhesive from normal frontal viewing.
- Raised members to read as continuous architectural relief.
- Central stem/branch transitions: no visible gap or overlap.
- Concealed wall mounting preferred.
- Material/construction method: fabricator recommendation requested.
